Workshop 1: Overview of Climate Science and Climate Café discussion

Workshop 2: Tools and Strategies for adapting to climate change (master plan, municipal audit, zoning ordinance, site plan and subdivision regulations, shoreland and wetland standards, haz mit plan, capital improvement plan, etc.). Review of discussion from workshop 1.

Workshop 3: Field Trip to Rye's saltmarshes – learned more about how salt marshes function and how they are resilient when it comes to sea level rise.

Workshop 4: Learn more about the Tides to Storms project gearing up this fall. Start exploring some of the priority topics in terms of possible actions to take.
