

**ISSUES TO CONSIDER
REGARDING
BUILD OUT OF SPACE
ABOVE THE FIRE TRUCK BAY**

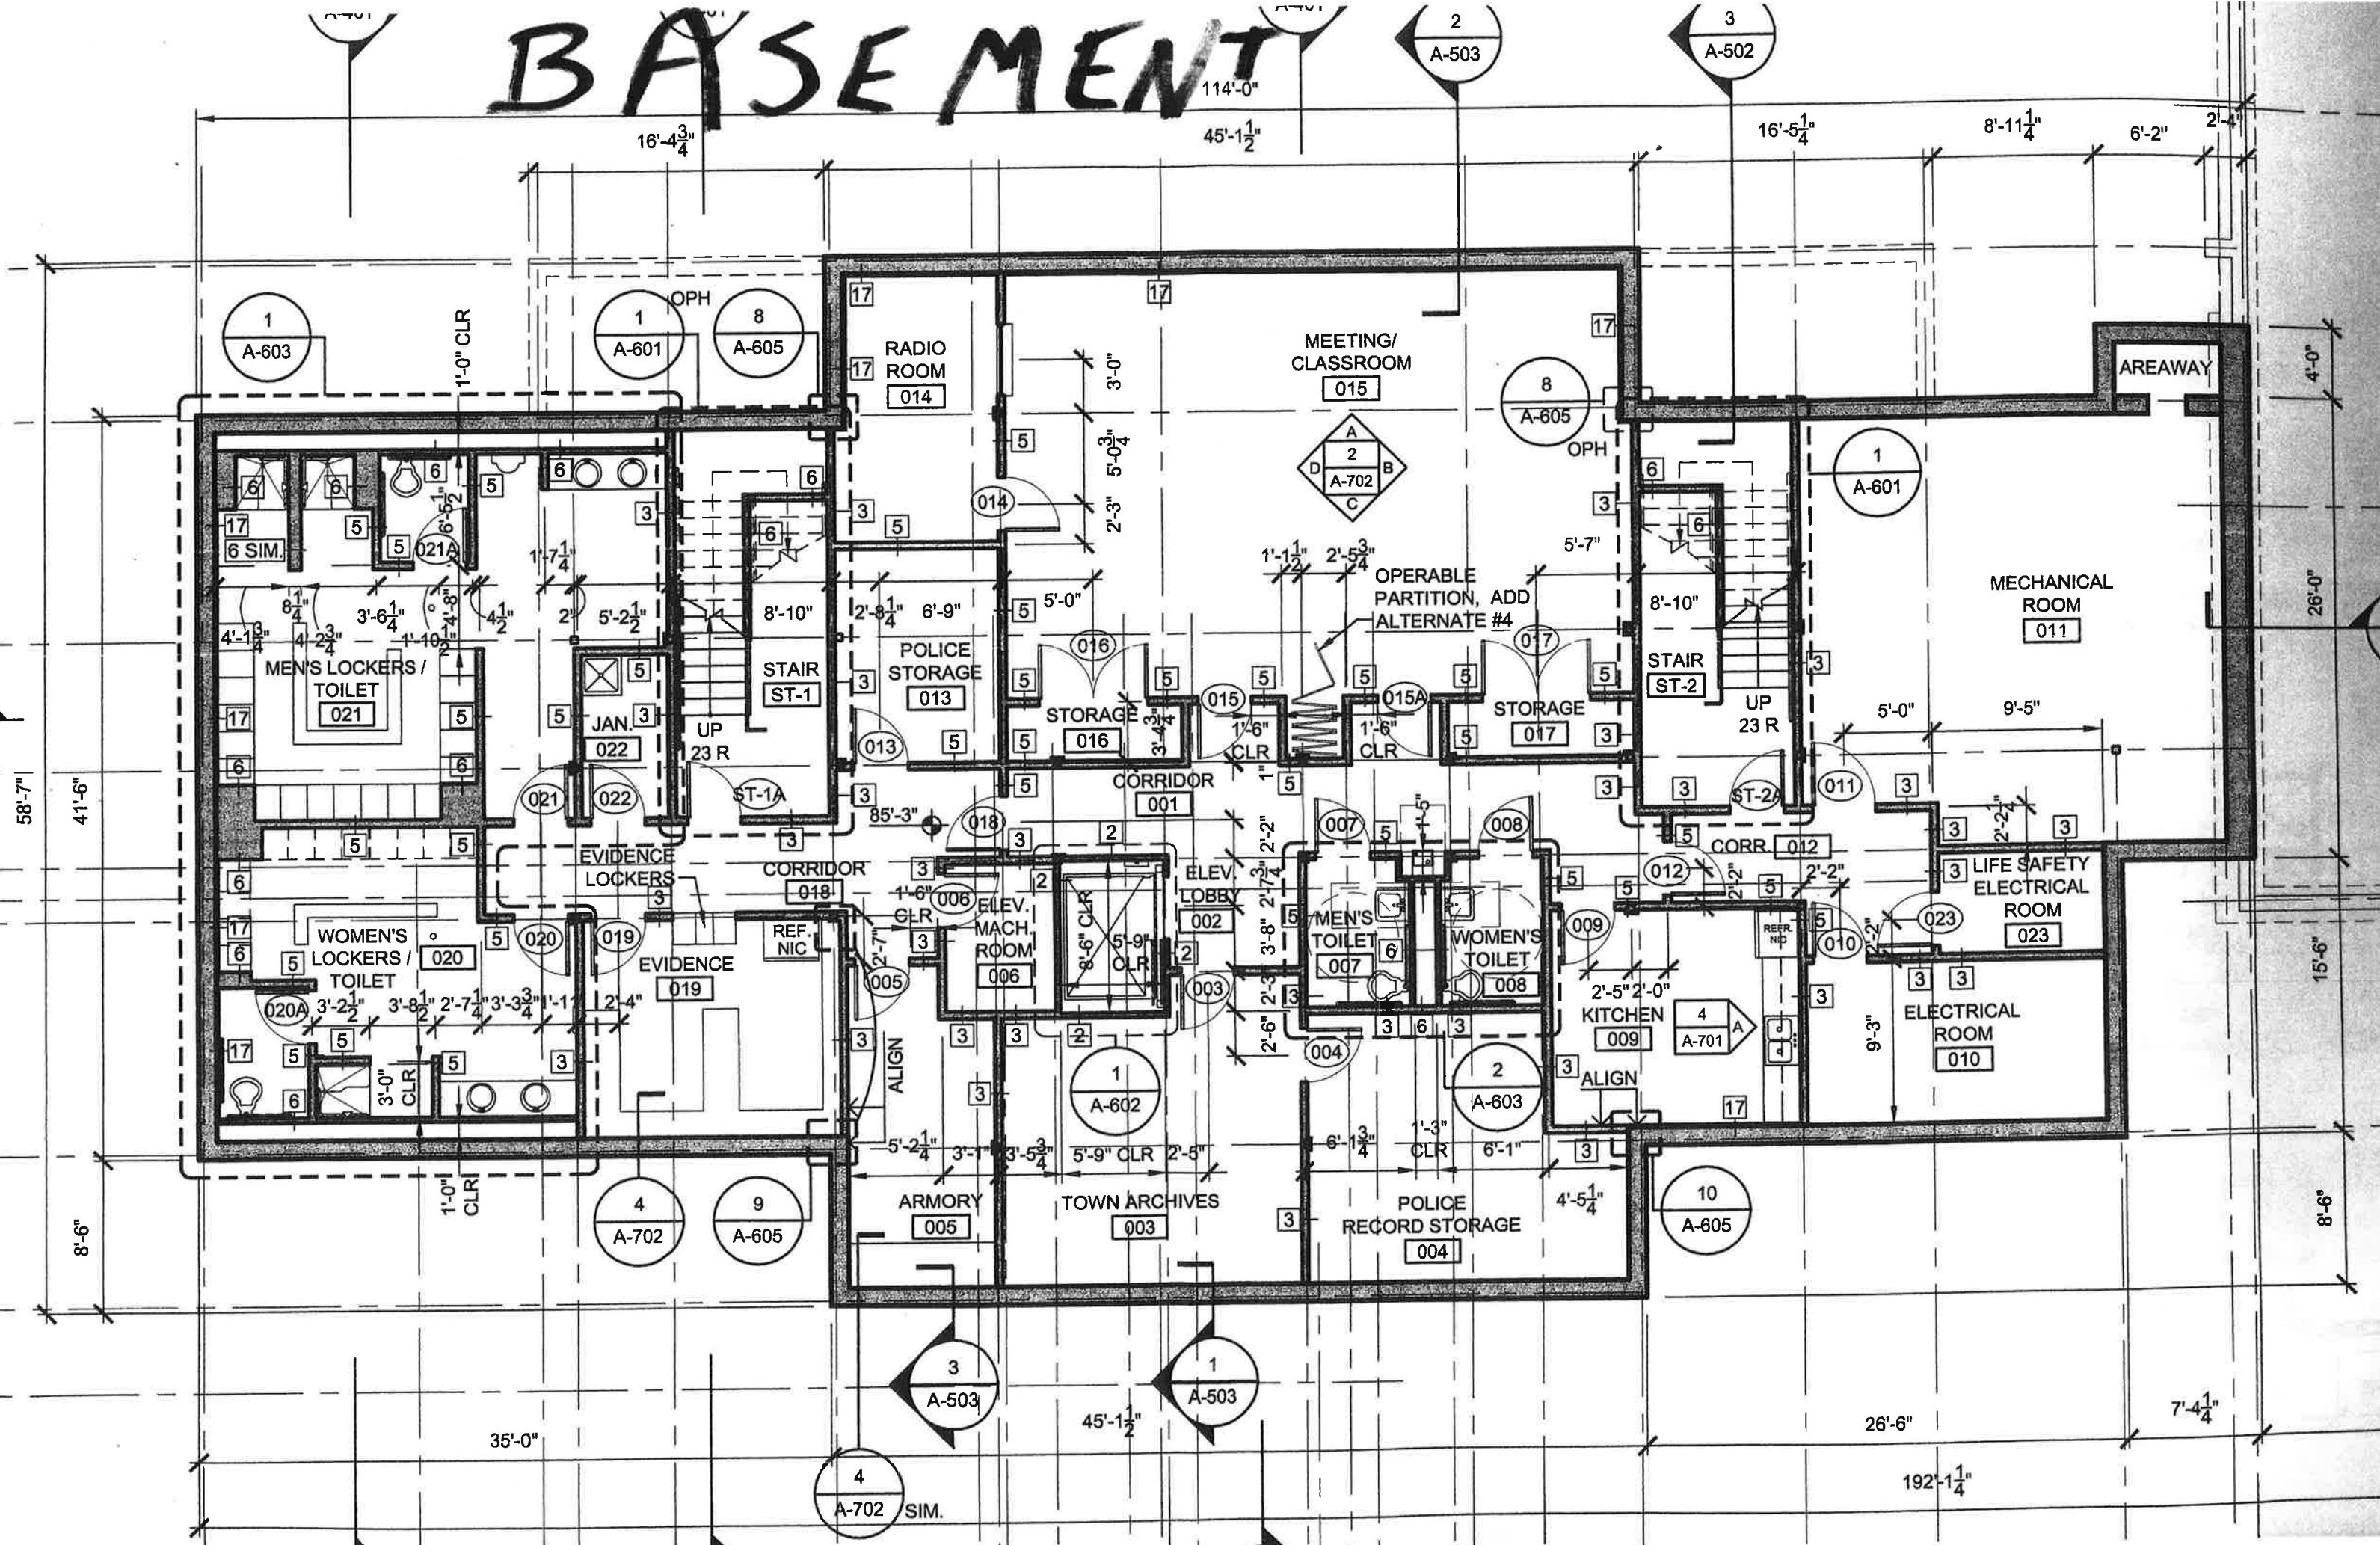

- 1. **SECURITY.** The Public Service Building is a secure building.
- 2. **DORMERS.** If used for office space, dormers likely would be necessary to provide light.
- 3. **ACCESS.** If used for office space, a separate entrance, including an elevator, would be required.
- 4. **PARKING.** If used for office space, additional parking may be required in the back of the building.
- 5. **WEIGHT BEARING/STRUCTURAL CAPACITY.** While there is some debate over this issue, if used for office space, potentially additional support may be required to handle the weight of files, employees, and citizens.
