

WHAT IS RYE 2035?

Rye 2035 is the town's new Master Plan, which will represent the town's community-driven vision for the future. The Plan will:

- Serve as a roadmap of strategies and actions the town will use to achieve the vision.
- Ensure that future decisions made by our town boards, committees, and developers are aligned with the community's priorities.
- Provide the foundation for determining effective public policy, capital improvements, and land use decisions in the future.
- Guide decision making on future growth, development, transportation, housing, municipal services, and natural resource protection.

The Planning Process
