The Coalition continues to offer the lowest residential energy supply rates in New Hampshire and out-perform energy service from investor-owned utilities for three consecutive rate periods.

The present downturn in electricity prices highlights the risk associated with a single multi-year brokered supply contract, which in this case has been undercut by utility rates.

### Comparing Utility, Broker, and Coalition Rates Over Time

*The broker example in this chart is fixed through December 2025.*

As market conditions adjust, the Coalition demonstrates several key advantages to competing models from utility- or broker-administered default supply.

- ⚡ The Coalition’s active portfolio management of wholesale power contracts enables the flexibility to respond to changing market conditions.
- ⚡ Our locally controlled and transparent process for setting rates continues to realize savings for customers.
- ⚡ Through our nonprofit structure, net revenues are deposited into financial reserve accounts to ensure long-term stability and benefits for Member communities.

## Coalition Member Cities, Towns, and Counties

Community Power Coalition of New Hampshire is a nonprofit power agency established as a governmental instrumentality and formed by over fifty New Hampshire cities, towns, and counties participating as Members. Our rates are set by our Board of Directors which is elected by the Membership.
